

### Numerical Reasoning

This section is based on your responses to the numerical reasoning assessment. Numerical reasoning relates to your ability to answer questions based on facts and figures, and your accuracy in interpreting data. Taking into account the number of questions answered correctly, you scored above average on this reasoning test. This suggests you are likely to accurately interpret numerical data more quickly and effectively than most applicants.

### Verbal Reasoning

This section is based on your responses to the verbal reasoning assessment. Verbal reasoning relates to your ability to understand, analyse and interpret written information. Taking into account the number of questions answered correctly, you scored above average on this reasoning test. This suggests you are likely to accurately interpret written information more quickly and effectively than most applicants.

### Logical Reasoning

This section is based on your responses to the logical reasoning assessment. Logical reasoning relates to your ability to identify rules, patterns and/or relationships between a series of shapes and apply what you have identified to the series. Taking into account the number of questions answered correctly, you scored above average on this reasoning test. This suggests you are likely to work with complex data or solve problems which are out of routine more quickly and effectively than most applicants.
