

Numerical reasoning measures the ability to understand numerical data and make logical deductions based on the data. This ability is important for any work that requires you to understand numerical information presented in a variety of forms, including tables and graphs, and to draw conclusions about what that data means when applied to specific contexts. Compared to a relevant comparison group you show a well above average level of numerical reasoning ability.

Development Tips

- Recognize that this is a significant strength for you, and that others may not reach correct conclusions as quickly or frequently as you do when it comes to dealing with numerical data.
- Use your ability to accurately make logical deductions from numerical data to inform your decisions or solve problems.
- Support others for whom this ability may not come as easily and share techniques of success.
- Numerical reasoning may not be a priority for your development in itself. However, consider how this ability may support some of your other development goals, such as being involved in a project where you can use these skills whilst developing another area, or look to get involved in tasks or projects that will challenge you in this area.

Verbal reasoning

Verbal reasoning measures the ability to understand verbal information and to evaluate arguments about this information in order to reach sound conclusions. This ability is important for any work involving the communication of ideas or the understanding of written information. You show a well above average level of verbal reasoning ability compared to a relevant comparison group.

Development Tips

- Recognize that this is a significant strength for you, and that others may not reach correct conclusions as quickly or frequently as you do when it comes to dealing with lots of verbal information.
- Use your ability to draw well-reasoned conclusions from verbal information to inform your decisions or to help you to support others in the summary of information and presentation of key themes.

11:58 pm

Here's the results for the Macquarie test, you smashed it lol

11:58 pm

They must have not liked my interview answers.
But I am normally good at interviews.

11:59 pm

18 March 2022

Oh man, that sucks

6:20 am ✓✓

There's always a degree of luck that plays into interviews though

6:20 am ✓✓

Don't worry I still have goldman sach's so I'm really happy lol

6:20 am

You smashed my test tho which is all that matters

6:20 am

Good stuff hahaha

6:20 am ✓✓

Are you okay to forward that report to my email at passpsychometrictests@gmail.com?
